SUMMARY

AI Engineer with 3 months of hands-on professional experience in developing AI-powered applications and intelligent automation solutions. Skilled in Python, FastAPI, React, REST APIs, LLM integration, RAG, prompt engineering, and AI agent development, with practical experience building end-to-end AI applications. Strong understanding of integrating AI models with backend systems, databases, and modern web interfaces to solve real-world problems. Passionate about emerging AI technologies, continuous learning, and building scalable, user-centric solutions. Seeking to contribute technical expertise and an innovative mindset to a forward-thinking AI/technology team.

EXPERIENCE

- **KindleBit Solutions Pvt. Ltd (AIML Engineer)** - June 2026 – September 2026
 - **BLUESTOCK.in (Data Analyst)** - May 2026 – July 2026
-

PROJECTS

AI_Insurance Chatbot (KindleBit Solutions)

August 2026

- An AI-powered full-stack insurance platform that combines a **React frontend, Python FastAPI backend, Groq LLM, RAG**, customer authentication, insurance policy management, policy purchasing, and AI-assisted claims processing.
- The application is developed to work like a real digital insurance agent: customers can communicate naturally with the AI, receive insurance guidance, purchase policies, manage their policies, and initiate claims through the same platform.

AI ChatBot (KindleBit Solutions)

July 2026

- **AI Info Generator** is an AI-powered conversational platform created to provide users with a complete chatbot experience rather than a simple API-based chat interface.
- A professional full-stack AI chatbot application built with **React 19, Vite, Tailwind CSS, FastAPI, SQLite, Groq, and OpenAI**.
- The application provides a ChatGPT-style conversational experience with **persistent chat history, multi-provider AI support, voice input, file analysis, image generation, JWT authentication, and a responsive modern UI**.

AI_Task_Agent (KindleBit Solutions)

September 2026

- AI Task Agent is a full-stack AI-powered productivity platform designed to execute business and administrative tasks from simple natural-language instructions.
- Instead of manually navigating through multiple screens and performing individual operations, users can describe what they want in plain English. The AI analyses the request, determines the required action, selects an approved backend tool, validates the parameters, executes the operation, and returns the result through the web interface.

Everyone Can Write Blog (Chitkara University)

June 2025

- Blog Website is a full-stack web application that allows authenticated users to create, manage, explore and interact with blog posts.
- The application demonstrates how a modern server-side web application can be built using the Node.js ecosystem, with Express.js handling the backend, MongoDB/Mongoose managing application data and EJS providing dynamic server-rendered pages.

CERTIFICATIONS

- Generative AI for Data Analysts - IBM
 - Introduction to Data Science and scikit-learn in Python - LearnQuest
 - AI Workflow: Data Analyst and Hypothesis Testing - IBM
 - AI for Scientific Research Specialization - LearnQuest
 - Deep Learning with PyTorch, Keras and TensorFlow - IBM
 - Generative AI: Prompt Engineering Basics - IBM
 - Introduction to Artificial Intelligence (AI) - IBM
 - Generative AI: Introduction and Applications
-

TECHNICAL SKILLS

- Python, AIML, Machine Learning, Deep Learning, RAG, LLM, Generative AI
-

EDUCATION

Bachelor of Engineering

Sep 2022 - July 2026

Computer Science Engineering

Chitkara Institute of Engineering and Technology, Patiala

Senior Secondary Education

Apr 2021 - Jun 2022

Central Board of Secondary Education

RIMT World School, Manimajra, Chandigarh
